Scenario Four – With friends on the Check and some wants to pay for their own items and others want to Split Equally

1. **Friend One** who wants to pay for his **specific items** will go through the steps of scenario Three. Once **you pick any of the items on the check "Split"** button will change to **"Continue "** and appears in Active mood. The line item where my share appears will read **"your share EGP100".** Once **"Continue"** button is pressed he will go to the payment confirmation screen.

2. **Friend two** who wants to **Split** will go through **Scenario Two.** Once he is on the check his button will read **"Split"** in clear and active blue color mood.

3. Once **"Split"** button is pressed, it changes to **"Continue "** and it appears in deemed mood. The line item where my share appears will read **"Splitting …"** until those **who are paying for their specific items are done and those who want to split the check press their "Split" button as well.**

4. Once friend one who is paying for his specific item is done he will no longer be on the check and only those who pressed "Split" will remain on the check, **only then the loading status reading "Splitting…" will change for everyone to "your split share EGP 100"** and the **"Continue"** button changes from deemed mood to active mood.

5. Once **"Continue"** button is pressed it takes you to the payment confirmation screen.

Scenario Five – With friends on the Check and everyone paid for their own items and I want to Split Equally

1. **Friend One** who wants to pay for his **specific items** will go through the steps of scenario Three. Once **you pick any of the items on the check "Split"** button will change to **"Continue "** and appears in Active mood. The line item where my share appears will read **"your share EGP100".** Once **"Continue"** button is pressed he will go to the payment confirmation screen.

2. **Friend two** who wants to **Split** will go through **Scenario Two.** Once he is on the check his button will read **"Split"** in clear and active blue color mood.

3. Once **"Split"** button is pressed, it changes to **"Continue "** and it appears in deemed mood. The line item where my share appears will read **"Splitting …"** until those who are paying for their specific items are done and those who want to split the check press their "Split" button as well.

4. Since everyone in that case paid for their specific items. **I will be alone on the check with no one to split with because everyone has paid for their items already. In this scenario the loading status reading "Splitting…" will change to "Your share EGP 100"** and the **"Continue"** button changes from deemed mood to active mood.

5. Once **"Continue"** button is pressed it takes you to the payment confirmation screen.
