Scenario Six – Three friends pressed split then one of them "undo" the split

1. If three friends are on the check and they all press split – the splitting scenario will apply (Scenario two)

2. If after they all pressed and the splitting amount is calculated and the "Continue" button is active then someone decided to "undo" his split. The users who remained on the "Split" will return to the start of the splitting process which is "Continue" button in deemed mood and "Splitting…" text reappear.

3. Once the user who decided to "undo" his split, pays for his specific items or leave the check, then the splitting for the other users will proceed normally.
